### Objective:

I am looking to work as a Software Developer in a Full-Stack, Frontend, or Backend role.

### Computer Experience:

#### **Software Engineer (full-stack)**

Jan 2021-Sep 2025

Techcyte – Orem, UT (full remote)

- App frontend and backend - Developed and expanded several new products
- Implemented an SAP sync/reporting system for billing and customer syncing
- Created new user workflows, file uploaders and reduced wasteful API calls

#### **Web Development Internship**

Summer 2020

Church of Jesus Christ of Latter-Day Saints ICS Department – Riverton, UT

- Assisted the Software Asset team with their software entitlements
- Updated internal emails to current layout and design
- Adjusted active ServiceNow workflows to execute properly

### Education:

#### **Bachelor of Computer Science with Math Minor**

Aug 2016-Dec 2020

Brigham Young University – Provo, UT | 3.29 GPA

### Volunteer Work:

#### **Full Time Service Worker and Minister**

Aug 2014-Aug 2016

Church of Jesus Christ of Latter-Day Saints – Orlando, FL

### Previous Projects:

#### **Lead Backend Owner and Developer**

##### **Betrayal at House on the Hill (mobile IOS game)**

- Designed and implemented Java Server with Mongo Database on AWS EC2
- IOS Swift frontend for IOS users

### Skills:

#### **Computer Languages, Databases, etc.**

Typescript/React   Golang   Python   AWS Lambda, etc.   Playwright+Jest   SQL/Mongo
